

USDA-ARS National Plant Germplasm System (NPGS)

The NPGS is one of the largest, most comprehensive collections of plant genetic resources in the world. It provides an invaluable foundation for agricultural innovation while safeguarding food security and driving on-farm profitability.

The NPGS maintains, characterizes, evaluates, documents, enhances, and distributes plant genetic resources and associated information.

To learn more about the NPGS and other USDA-ARS genetic resources collections, visit ars-grin.gov
